

## RECOMMENDED SPARE PARTS FOR MOST BOILERS

- Burner ignition electrodes
- Honeywell Flame scanner (Mini-Peeper)
- Burner Fan Blower Wheel
- Burner Blower Motor
- Hand Hole Gaskets – (Two sizes required on Indeck Boiler)
- Water Gauge Glass “O” Rings
- Water Gauge Glass
- Water Control relays - Warwick
- Gas Pilot regulator
- Pilot Gas solenoid valve
- Burner Diffuser (Spinner)
- Honeywell Relay RM 7840 L 1018 **or similar**. Check unit on boiler.
- Automatic Blowdown Probe, if you have an automatic Blowdown system
- On Boilers with motorized Feed Water valves, we recommend keeping a spare valve and actuator.
- Feed Water Pump if a spare is not hooked up and piped in line.

**Please note all these parts are normally readily available. However, in critical production conditions where time is important, we recommend that the above items should be kept in stock.**

**Always have a reliable Boiler Mechanic Service Company assigned to your plant, encase you have, to have work done on your equipment in an emergency.**
